Mission Statement

Cedar Valley Bone Health Institute will promote good bone health in Northeast Iowa.
We are Professional Partner Members of the National Osteoporosis Foundation.
We will provide DXA and other testing for osteoporosis in a single visit.
Our DXA tests will meet International Society for Clinical Densitometry standards.
Our DXA scans will be read by ISCD Certified Clinical Densitometrists.
Our technicians have been calibrated to ISCD standards.
We will prescribe individualized treatment for each patient.
We will co-ordinate our care with others caring for our patients.
We will promote measures for good bone health for individuals of all ages.
We will improve quality of life through prevention and treatment of osteoporosis.

Referrals

We ask that every patient be referred by their primary physician.
This promotes optimal co-ordination of care for each individual patient.
